City Calls Attention to Ordinance After Some Fail to Improve Conditions.

If you have not already done so you had better get busy and clean your sidewalks, whether it is in front of your residence, away out at the edge of town or in the heart of the business section. For the city solons have ordained that the ordinance relative to maintaining clean sidewalks must be obeyed.

Attention has been called to the city officials that in some parts of Maryville a few persons have falled to keep their sidewalks properly cleaned of snow and ice. As a result pedestrians along those places are hindered and inconvenienced besides making walking dangerous to older persons.

"We are going to see to it that this ordinance is adhered to, even if it necessitates the arrest of procrastinators," said a city official today.

### New Wooltex Tailored Coats and Suits for Women

WOMEN are charmed with the refinement and elegance of Wooltex coats and suits the moment they try them on, but one of the chief reasons why we so confidently recommend Wooltex garments, is because of the superlative quality of the fabrics and the superior workmanship with which the garments are constructed.

Style Correctness and Quality Wooltex garments express in the highest degree style-correctness and artistic beauty; but in addition they possess a superiority of quality in every detail which is most gratifying to the woman who wears the coat or unit. There is a steeling honesty about suit. There is a sterling honesty about the all-wool materials. They are thoroughly shrunk before being cut. Every seam is sewn with care by expert workers in one of the best

equipped, most sanitary factories in America. Every Wooltex garment is fully guaranteed by the manufacturers as well as ourselves. We are glad to have our customers select Wooltex garments because we know that they will always give the

fullest possible satisfaction. The picture shows a very handsome coat which expresses many of the points of superiority of Wooltex garments. The pleasing girdle effect in front is produced by cleverly applied folds of the material. The fullness of the skirt in the back is gathered below a long curving waist-line set low down and outlined with closely-set buttons. This is a model that will be especially becoming to tail women with full figures. Many other equally charming models in both coats and suits are now here inviting your inspection.
